United States Standards for Grades of Cabbage

Effective September 1, 1945
(Reprinted - January 1997)

United States Standards for Grades of Cabbage¹

Grades

51.450 U.S. No. 1.

51.451 U.S. Commercial.

Unclassified

51.452 Unclassified.

Size

51.453 Size.

Application of Tolerances

51.454 Application of tolerances.

Definitions

51.455 Similar varietal characteristics.

51.456 Reasonable solidity.

51.457 Puffy.

51.458 Seedstems.

51.459 Damage.

51.460 Well trimmed.

51.461 Fairly well trimmed.

51.462 Wrapper leaves.

51.463 Reasonably firm.

51.464 Serious damage.

Grades

§51.450 U.S. No. 1.

U.S. No. 1 shall consist of heads of cabbage of one variety or similar varietal characteristics, which are of reasonable solidity, and are not withered, puffy, or burst and which are free from soft rot, seedstems, and from damage caused by discoloration, freezing, disease, insects or mechanical or other means. Stems shall be cut so that they do not extend more than one-half inch beyond the point of attachment of the outermost leaves.

(a) Unless otherwise specified, each head shall be well trimmed. However, cabbage which has fairly good green color and is specified as "U.S. No. 1 Green," and red cabbage which is specified as "U.S. No. 1 New Red" need be only fairly well trimmed.

(b) In order to allow for variations, other than excess number of wrapper leaves, incident to proper grading and handling, not more than a total of 10 percent, by weight, of the heads in any lot may fail to meet the requirements of this grade, but not more than one-fifth of this amount, or 2 percent, shall be allowed for soft decay. In addition, not more than 10 percent, by weight, may not meet the requirements as to number of wrapper leaves. (See §51.454.)

¹Compliance with the provisions of these standards shall not excuse failure to comply with the provisions of the Federal Food, Drug and Cosmetic Act, or with applicable State laws and regulations.

§51.451 U.S. Commercial.

U.S. Commercial shall consist of heads of cabbage which meet the requirements for U.S. No. 1 grade except for the increased tolerance for defects specified below, and except that the heads shall be reasonably firm.

(a) Unless otherwise specified, each head shall be well trimmed. However, cabbage which has fairly good green color and is specified as "U.S. Commercial Green," and red cabbage which is specified as "U.S. Commercial New Red" need be only fairly well trimmed.

(b) In order to allow for variations, other than excess number of wrapper leaves, incident to proper grading and handling, not more than a total of 25 percent, by weight, of the heads in any lot may fail to meet the requirements of this grade, but not more than two-fifths of this amount, or a total of 10 percent, shall be allowed for defects causing serious damage, but not more than 2 percent shall be allowed for soft decay. In addition, not more than 10 percent, by weight, may not meet the requirements as to number of wrapper leaves. (See §51.454.)

Unclassified

§51.452 Unclassified.

Unclassified shall consist of cabbage which has not been classified in accordance with the foregoing grades. The term "unclassified" is not a grade within the meaning of these standards but is provided as a designation to show that no definite grade has been applied to the lot.

Size

§51.453 Size.

The minimum size or minimum and maximum sizes may be specified in connection with the grades as "U.S. No. 1, 1 pound min.," or "U.S. No. 1, 2 to 4 pounds," or any lot may be classified as Small, Medium, Large, Small to Medium, or Medium to Large in accordance with the facts.

Small	Medium	Large
Pointed, under 1-1/2 lbs.	1-1/2 to 3 lbs.....	Over 3 lbs.
Danish and domestic, under 2 lbs.	2 to 5 lbs.....	Over 5 lbs.

(a) In order to allow for variations incident to proper sizing, not more than a total of 15 percent, by weight, of the heads in any lot may vary from the size specifications, but not more than 10 percent may be either above or below the size specified. This tolerance is in addition to the tolerance for grade defects. (See §51.454.)

Application of Tolerances

§51.454 Application of tolerances.

The contents of individual containers in the lot, based on sample inspection, are subject to the following limitations, provided the averages for the entire lot are within the tolerances specified:

(a) When a tolerance is 10 percent or more, individual containers in any lot shall have not more than one and one-half times the tolerance specified, except that at least one defective and one off-sized cabbage may be permitted in a container.

(b) When a tolerance is less than 10 percent individual containers in any lot shall have not more than double the tolerance specified, except that at least one defective and one off-sized cabbage may be permitted in a container.

Definitions

§51.455 Similar varietal characteristics.

"Similar varietal characteristics" means that the cabbage in each container shall have the same general characteristics.

§51.456 Reasonable solidity.

"Reasonable solidity" means fairly firm for pointed type cabbage and southern Domestic type cabbage. Northern Domestic type cabbage and Danish or Hollander type cabbage shall be firm.

"Reasonable solidity" as applied to Savoy cabbage means not soft or puffy; Savoy type cabbage is characteristically loosely formed and rather light in weight.

§51.457 Puffy.

"Puffy" means that the heads are very light in weight in comparison to size, or have excessive air spaces in the central portion. They normally feel firm at time of harvesting but often soften quickly. They are known as "Balloon Heads" in certain sections.

§51.458 Seedstems.

"Seedstems" means those heads which have seed stalks showing or in which the formation of seed stalks has plainly begun.

§51.459 Damage.

"Damage" means any injury or defect which materially affects the appearance, or the edible or shipping quality. Worm injury on the outer head leaves or wrapper leaves which materially affects the appearance of the head or worm holes which extend deeply into the compact portion of the head shall be considered as damage.

§51.460 Well trimmed.

"Well trimmed" means that the head shall not have more than four wrapper leaves.

§51.461 Fairly well trimmed.

"Fairly well" trimmed means that the head shall not have more than seven wrapper leaves.

§51.462 Wrapper leaves.

"Wrapper leaves" means leaves which do not enfold the head fairly tightly more than two-thirds the distance from the base to the top.

§51.463 Reasonably firm.

"Reasonably firm" means that the head is not soft and is of reasonable weight for its size but may have considerable open spaces between the leaves in the lower portion of the head.

§51.464 Serious damage.

"Serious damage" means any injury or defect which seriously affects the appearance, or the edible or shipping quality. Cabbage which is affected by soft rot or which is seriously puffy, badly burst, or seriously injured by seedstems, discoloration, freezing, disease, insects, mechanical or other means shall be considered as seriously damaged. Worm injury on the outer head leaves or wrapper leaves which seriously affects the appearance of the heads, or worm holes which seriously affect the compact portion of the head shall be regarded as serious damage.
